

## ABSTRACT

Isolated polypeptides are disclosed selected from the group consisting of:

5 (a) polypeptides comprising an amino acid sequence which has at least 90% identity with a sequence of a mature polypeptide comprised in the group of SEQ ID NO: 26 to SEQ ID NO:50;

(b) polypeptides which are encoded a nucleotide sequence which hybridize under high stringency conditions with a polynucleotide probe selected from the group consisting of

10 (i) the complementary strand to a nucleotide sequence selected from the group of regions of SEQ ID NO: 1 to SEQ ID NO: 25 encoding a mature polypeptide.

(ii) the complementary strand to the cDNA sequence contained in a nucleotide sequences selected from the group of regions of SEQ ID NO: 1 to SEQ ID NO: 25 encoding a mature polypeptide

15

wherein the polypeptides have a function of the corresponding mature polypeptides comprised in SEQ ID NO:26 to SEQ ID NO:50
